Summary

Full Stack Developer (MERN / Next.js) with 2+ years of professional experience shipping production-grade web applications for real clients. Proficient in React.js, Node.js, MongoDB, PostgreSQL, TypeScript, REST APIs, and JWT authentication. Experienced with Python web scraping (Playwright, Selenium), FastAPI, GitHub Actions CI/CD, and AI integrations (Gemini, Vapi). Track record of reducing query times by 30%, improving load speeds by 40%, and delivering measurable business outcomes.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux Toolkit, React Router, Axios, Tailwind CSS, Shadcn UI, Bootstrap

Backend: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, OAuth 2.0

Databases: MongoDB, PostgreSQL, Prisma ORM, Firebase Firestore

Scraping & Automation: Playwright, Selenium, Python Scripting, N8N Workflow Automation

DevOps & Tools: Git, GitHub, GitHub Actions, Vercel, Postman, Ngrok, Puter.js, Generative AI APIs

Professional Experience

Kriscent Techno Hub Pvt. Ltd.

Jan 2026 – Present

Software Engineer

Kota, Rajasthan, India

- Architected a full-stack API Monetization Platform using Next.js and TypeScript, onboarding 5+ clients with configurable per-hit pricing, rate limiting, and role-based access control.
- Modeled PostgreSQL schemas with Prisma ORM covering usage logs, subscriptions, and billing; surfaced real-time pie-chart analytics that cut manual reporting effort by 60%.
- Shipped a Medicine Price Comparison tool powered by a Python scraper (Playwright + Selenium) covering 3+ pharmacy websites, reducing price research time by 50% for operators.
- Built the companion Next.js dashboard with full CRUD, variant tracking, and a request workflow that lets operators flag unavailable drugs directly to admins, eliminating back-and-forth email.
- Delivered FastAPI endpoints serving scraped drug data with sub-100ms response times under concurrent load.
- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, Shadcn UI, PostgreSQL, Prisma ORM, FastAPI, Python, Playwright, Selenium.

Error Technology

Jun 2025 – Nov 2025

MERN Stack Developer

Hyderabad, Telangana, India

- Authored MongoDB aggregation pipelines for a sales analytics module across 3 production applications, cutting average query execution time by 30%.
- Secured the entire API layer with JWT-based authentication and role-based access control (RBAC), protecting 15+ endpoints across 2 services.
- Refactored 3 React.js SPAs using advanced hooks, memoization, and Redux Toolkit, improving page load speed by 40% and reducing unnecessary re-renders by 60%.
- Authored Express.js middleware for centralized input validation and error handling, reducing bug-report volume by 25% in the first sprint after release.
- Configured GitHub Actions CI/CD pipelines for Vercel deployments, shrinking average release cycle from 2 days to under 4 hours.

Digital Technology Solutions

Oct 2023 – Jun 2025

MERN Stack Developer

Delhi, India

- Developed 6+ client-facing web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), supporting up to 10,000 monthly active users.
- Optimized MongoDB aggregation pipelines for high-traffic reporting dashboards, cutting query time by 30% and improving dashboard load by 2 seconds.
- Connected 10+ third-party REST APIs including payment, maps, and notification services, consolidating them behind a unified internal SDK.
- Managed production deployments on Vercel and Render, maintaining 99.5% uptime across all environments.

- Partnered with UI/UX designers and product managers across 4 cross-functional projects, delivering each release within the agreed sprint timeline.

No Broker

Mar 2021 – May 2022

Customer Support Executive

Bengaluru, Karnataka, India

- Handled 200+ inbound and outbound customer tickets daily with a 90%+ same-day resolution rate, maintaining top-tier satisfaction scores across 14 consecutive months.
- Upsold platform subscription plans to property owners, contributing to a 15% month-over-month revenue increase in the assigned territory.
- Redesigned the tenant onboarding checklist in collaboration with the operations team, cutting average onboarding time by 25%.

Eat 'N' Drink

May 2018 – Apr 2020

Founder & Operations Lead

Kota, Rajasthan, India

- Scaled a 24/7 food delivery venture from 0 to 500+ monthly orders, achieving 99% fulfillment rate across Zomato and Swiggy platforms.
- Cut operating costs by 18% within 6 months by automating order routing and restructuring supplier contracts; led a 12-member team through 2 peak seasons.
- Launched Google Ads and social media campaigns that compounded to 45% year-over-year growth in online orders over 2 years.

Big Belly

Apr 2017 – Mar 2018

Founder

Bengaluru, Karnataka, India

- Founded a hybrid B2B/B2C food venture, closing 40+ recurring corporate and retail clients within the first 12 months of launch.
- Ran a 3-month targeted marketing push that expanded the customer base by 50% and reduced monthly churn from 18% to under 5%.

Caliber Foods

Apr 2016 – Apr 2017

Founder

Bengaluru, Karnataka, India

- Launched a subscription meal service from scratch, enrolling 200+ paying customers within 6 months through direct outreach and referral programs.
- Sustained a 98% on-time delivery rate over 12 months and grew website traffic by 35% via SEO and email marketing.

Projects

Team Collab Website

- Engineered a MERN-based team workspace supporting real-time group messaging across unlimited channels, with sub-200ms message delivery via Socket.io.
- Secured the platform with Firebase Authentication and granular role-based access control (RBAC), supporting Admin, Manager, and Member permission tiers.
- Integrated a Gemini-powered Task Assistant that reduced manual task creation time by 70% through natural-language commands for assignment and deletion.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Socket.io, Firebase, Gemini API.

Mock Wiser

- Built an AI-powered mock interview platform with Next.js SSR, cutting initial page load to under 1.2 seconds through server-side rendering and static optimization.
- Wired Vapi for real-time voice interviews and Gemini for post-session feedback scoring across 10+ competency dimensions.
- Secured user sessions with Firebase Authentication, supporting Google OAuth and email/password flows with zero reported auth incidents post-launch.
- **Tech Stack:** Next.js, TypeScript, Vapi, Firebase, Gemini API, Tailwind CSS.

Education

Indian Institute of Technology Madras (IIT Madras)

Jan 2026 – Jan 2030 (Expected)

BS in Data Science and Applications — Online Degree Program

Dayananda Sagar College of Engineering

Aug 2016

B.Tech in Telecommunication Engineering

Bengaluru, India

Holy Mother Senior Secondary School

May 2013

Higher Secondary (Class XII)

Certifications

- **Generative AI Mastermind** — Outskill 
- **MERN Stack Developer** — AchieversIT (*Jan 2025*) 
- **MERN Stack Developer** — Acciojob (*Jun 2024*) 

Coursework & Continuous Learning

- MERN Stack Development: MongoDB, Express.js, React.js, Node.js
- RESTful API Design, JWT Authentication, OAuth 2.0
- State Management with Redux Toolkit and Context API
- Modern JavaScript (ES6+), TypeScript, Responsive UI Design
- Real-time Applications using Socket.io
- CI/CD Practices and Version Control with Git & GitHub
- Data Structures & Algorithms — solved 1000+ problems for algorithm proficiency
- Automation workflow development using N8N, integrated with production websites
- Data Science and Machine Learning (IIT Madras BS Program — ongoing)
